Allowable Subject Matter

1. Claims 1-42 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record, namely the Loveless, Baran, Thompson et al, Pavlic et al, and Harney et al patents, and the Stoneback et al article, cited by applicant, alone or in combination, do not teach or fairly suggest that variously claimed, as set forth in the 'Detailed Discussion of the References', Paper #3. As to the remaining references: the Theriault, Douglass et al, and Pidgeon et al patents, and the Wenzel article, also cited by applicant, alone or in combination, do not teach or fairly suggest that claimed variously. Namely, the prior art does not teach or suggest an apparatus for controlling return path loss in a two-way communication system as claimed in claim 1, particularly having a forward path filter means having a resonant circuit component, a return path filter means having a resonant circuit coupled to the component, and an attenuator means included in the return path filter means. Further, the prior art does not teach or fairly suggest a passive filter for controlling return path loss in a communication system as claimed in claims 12 and 39, particularly having a housing of less than about 5 cubic inches enclosing first and second passive filter networks, wherein the latter includes a passive attenuator network which attenuates signals in the return path. Further, the prior art does not teach or fairly suggest an apparatus and method for controlling return path loss in a communication system as claimed in claims 29 and 35, respectively, particularly having a windowed highpass filter having a highpass passband which passes signals in the forward path and

a bandpass passband or window which passes signals in the return path, and an attenuator means coupled to the windowed highpass filter for attenuating signals passing through the window.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any response to this action should be:
